Project Name	WEB PHISHING DETECTION
Maximum Marks	2 Marks

Customer Problem Statement:

A user while using the internet gets redirected to malicious websites via phishing links using various sources such as emails, links through messages, advertisement links,malicious links etc. Phishing is the attempt made to steal the users personal information .The user gets frustrated because of this and hates to browse through the internet.So we need a method to overcome this intrusion to prevent many more victims of web phishing.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Internet user	Browse the internet	Determine a fraud	An attacker steals my information	Unsafe about my information shared over a network
PS-2	Email user	Open and work on emails	Detect a malicious email	They are not authorized and looks suspicious	My emails are under a thirdparty intrusion
